

## IMPORTANT website notice – August 2021

### HST SEM Programme

### Change to entry criteria ahead of July 2022 intake

---

#### MSc SEM

The MSc SEM will no longer be a mandatory requirement as part of the HST SEM eligibility criteria, from the next intake onwards.

However, please note that all successful candidates who will be appointed to the training programme in the future will be required to successfully complete an MSc SEM course recognized by the Faculty of Sports and Exercise Medicine before being awarded a CCST in SEM by FSEM.

Therefore, candidates will now have the choice to either complete a recognized MSc in SEM course before applying for the HST SEM programme, or complete their Masters while on the HST SEM programme. Provisions will be made for trainees who want to complete their MSc on programme, either on a full-time or part-time basis.

The revised HST SEM application pack for the July 2022 intake will be made available on the website in November 2021.
